Some excerpts from the speakers

#### 'BROADBAND FOR SUSTAINABLE DEVELOPMENT'

By **S. K. Sharma, MIE, Sr. Manager (Elect.) & Gagan Goel, Dy. Manager (Electrical) IFFCO AONLA UNIT, BAREILLY:**

The benefits of new technologies, especially ICTs, should be made available by government in cooperation with the private sector to meet the objectives of MDG in the country.

Broadband networks may even pay for themselves, due to savings made in delivering services. In Australia, for example, it has been estimated that cost savings in healthcare alone could pay for the country's National Broadband Network twice over.

For developing countries, the solution is likely to be found in mobile broadband — using a mobile phone, of which there are now some five billion worldwide, to connect to the information society. By improving education, medical services, trade and more, broadband Internet access can make a tremendous difference. High-speed networks can lead to high-speed growth.

#### 'ANALYSIS AND COMPARISON OF PEAK-TO-AVERAGE POWER RATIO REDUCTION TECHNIQUES IN OFDM SYSTEMS': AN OVERVIEW By Pankaj Sharma, MIT-Moradabad:

Orthogonal Frequency Division Multiplexing (OFDM) is one of the most attractive technologies in the current broadband wireless communication system due to its robustness against multipath fading. However, one of the serious drawbacks of OFDM system is its high Peak-to-Average Power Ratio (PAPR) which leads to power inefficiency in RF section of the transmitter. The paper presents some of the important PAPR reduction techniques and compared on the basis of implementation

#### 'ULTRA-BROADBAND TERAHERTZ WAVES'

By **Sovan Mohanty Department of Elect. & Communication Engineering, SRMS CET, Bareilly:**

Terahertz technology promises rich fund of new science in the near future. Most recent developments of semiconductor technologies show clear potential to achieve data rate of multiple tens of Gbps.

One of the possible solution to NLOS seamless communication service in THz range is to develop smart and advance antenna techniques like beam forming and beam switching.

### Report on World Environment Day On 5<sup>th</sup> June 2014 at 638, Beharipur Civil Lines, opp. City Railway Station, Bareilly (Centre Office)

#### Theme : 'SMALL ISLANDS AND CLIMATE CHANGE'

World Environment Day 2014 (WED) was celebrated by Bareilly Local Centre, IE (I) on 05-06-2014, at the office of Bareilly Local Centre.
